

CSC 214 ASSIGNMENT 10

Happy Summer Funtime Edition

Note: Cheating is still against the rules. Don't.

This is newish, you should read it: This is my end of the school year gift to you. This assignment is optional. You may redo one of your previous labs for full credit, or you may use this week to work on your final project.

It's up to you. Project 3 is still due 5/3.

You can find all of the previous assignment descriptions [here](#).

Assignment Instructions

1. Redo and resubmit a previous *homework assignment* for full credit (you may not redo a project). Be sure to mention exactly which assignment you'd like to replace the grade for. Or, if you're happy with your previous grade, skip this one at no penalty. **Extra credit is not available on this assignment. You may earn a maximum of 100/100 points.**

HAND IN

Before handing in, create two additional files in your lab directory:

1. Create a README that contains the following:
 - a. Your contact information, TA name, and assignment number.
 - b. A brief (one paragraph at most) description of the assignment.
2. Create a directory titled "SampleOutput." This directory should contain:
 - a. A file called "logs.txt" that contains examples any relevant logs generated by your application. Remember to use LogCat filters to show *only* your log messages before copying them into the file.

- b. Screenshots (in PNG or JPG format) taken from an Android Virtual Device that show examples of your application's user interface.

Hand in by uploading the compressed (i.e. "zipped") folder containing your Android Studio project and the required additional files to Blackboard. Remember that **late submissions are not accepted**.
