

CSC 214 ASSIGNMENT 8.5

Spring Has Sprung Edition

Note: Cheating is still against the rules. Don't.

This is new, you should read it: This assignment is optional. You may redo one of your previous labs for full credit, or you may use this week to work on your second project.

It's up to you.

You can find all of the previous assignment descriptions here [in this share](#).

Assignment Instructions

1. Redo and resubmit a previous assignment for full credit. Be sure to mention exactly which assignment you'd like to replace the grade for. Happy "Spring!" Or, if you're happy with your previous grade, skip this one at no penalty. **Extra credit is not available on this assignment. You may earn a maximum of 100/100 points.**

HAND IN

Before handing in, create two additional files in your lab directory:

1. Create a README that contains the following:
 - a. Your contact information, TA name, and assignment number.
 - b. A brief (one paragraph at most) description of the assignment.
2. Create a directory titled "SampleOutput." This directory should contain:
 - a. A file called "logs.txt" that contains examples any relevant logs generated by your application. Remember to use LogCat filters to show *only* your log messages before copying them into the file.
 - b. Screenshots (in PNG or JPG format) taken from an Android Virtual Device that show examples of your application's user interface.

Hand in by uploading the compressed (i.e. "zipped") folder containing your Android Studio project and the required additional files to Blackboard. Remember that **late submissions are not accepted**.
